

Using the City's Technology Marketplace Suppliers

I. Evolution of the Technology Marketplace

The City's Technology Marketplace originated in the 1990's as an efficient purchasing model for the City's technology needs. It reduces the time required to complete a transaction from several months to 1-2 weeks. Through continuous process improvements, it now consists of 50+ suppliers.

II. Current Technology Marketplace Structure

The City's current Technology Marketplace consists of 50+ suppliers with whom OCA has previously negotiated multi-year Term Contracts for as-needed purchases of technology goods and services. Because the suppliers were awarded contracts pursuant to an RFP completed by OCA, there is no need for a public solicitation for each transaction. The suppliers are broken down into three Tiers:

	Tier 1	Tier 2	Tier 3
Technology Offerings Available for Purchase	All products and services, including cloud products if data is at or below "Level 3-Low" sensitivity.	All products and services, <i>except</i> cloud products.	Products and services for which the company is LBE certified. <i>Cannot sell cloud products.</i>
Transaction Limits	<ul style="list-style-type: none">• Commodities: \$2.5M• Services: \$2.5M	<ul style="list-style-type: none">• Commodities: \$2.5M• Services: \$2.5M	<ul style="list-style-type: none">• Commodities: \$200K• Services: \$600K
Competitive Solicitation Thresholds	<p>≤ \$25K: Bid not required.</p> <p>> \$25K:</p> <ul style="list-style-type: none">○ Commodities/Low Bid: Bid out by OCA.○ Services (or Commodities mixed with Services): RFP by Dept.	<p>≤ \$25K: Bid not required.</p> <p>> \$25K:</p> <ul style="list-style-type: none">○ Commodities/Low Bid: Bid out by OCA.○ Services (or Commodities mixed with Services): RFP by Dept.	<p>< 200K: Bid not required.</p> <p>≥ \$200K:</p> <ul style="list-style-type: none">○ Commodities/Low Bid: N/A○ Services (or Commodities mixed with Services): RFP by Dept.

To use the Technology Marketplace, Departments submit a Requisition in PeopleSoft for OCA review. Once approved, a purchase through the Technology Marketplace results in a Purchase Order issued by OCA to the Technology Marketplace reseller. The Purchase Order draws down on the Technology Marketplace reseller's Term Contract with the City and is subject to its terms and conditions.

Departments cannot sign any agreements, but must abide by the manufacturer's license, use and support terms. All other matters are governed by the Term Contract between the Technology Marketplace reseller and City.

III. Funding Considerations

Because the purchase results in a Purchase Order, and not a departmental contract, the department must be able to provide the **full** funding upfront. However, under limited circumstances, OCA may allow purchase orders issued through the Technology Marketplace to be funded over time via change orders, so long as all approvals were obtained at full amount.

IV. Technology Marketplace Checklists and Reseller Information:

Use the applicable checklist to submit a requisition under this Option.

- [Appendix A: Technology Marketplace \(TM\) Checklist: Commodities](#)
- [Appendix B: Technology Marketplace \(TM\) Checklist: Professional Services](#)

- [Appendix C: Technology Marketplace \(TM\) Suppliers](#)

V. Cyber Risk Assessment (CRA) Requirements and Applicability

I. Overview of the Cybersecurity Risk Assessment (CRA) Process

1. In-Scope Procurements:

- A. CRA review of submission through DT's LogicGate is mandatory prior to DT CIO review; and
- B. Certificate of Completion or Risk Acceptance Confirmation must be uploaded to a contract or requisition in PeopleSoft.

To submit your contract for CRA review, contact your Department's CRA representative, which can be found here: [User Access List](#). Review this [user guide](#) for additional information.

Sharing of Certificates of Completion and Risk Acceptance Forms between Departments Not Permitted!

All new and existing Certificates of Completion and Risk Acceptance Forms will include the department and supplier names. These forms are based on a department's specific use case, which varies department by department. As such, they cannot be shared between different departments. However, they *can* be shared between divisions within the same department.

2. Out-of-Scope Procurements:

- A. CRA review submission through LogicGate is optional.

B. Out-of-scope confirmation email from (i) Department's CISO, (ii) DT Office of Cyber Security, or (iii) LogicGate must be uploaded to a contract or requisition in PeopleSoft. The confirmation email must clearly state the out-of-scope reason.

II. What is Considered "In-Scope" for CRA Review?

1. **Professional Services.** All instances where a non-City employee is given access of any kind to City networks or systems (e.g., IT support, software installation, etc.).
 - **Examples:** Contracting services hired to support applications and data management.
 - **Exclusions:** Training services or services where a contractor does not have access to City data or systems OR they are using City- provided equipment.
2. **Sensitive Data Access:** Contractors that have access to and/or store Level 3-5 City data on their systems during the performance of the contract. Please refer to the COIT data classification standard: <https://sfcoit.org/datastandard>
 - **Examples:** Level 3-5 data includes sensitive and compliance-related data, such as HIPAA, CJIS, and IRS data.
 - **Exclusions:** Level 1-2 public data.
3. **Operational Technology:** Hardware and software that detects or causes a change through the direct monitoring and control of industrial equipment, assets, processes, and events. OT is common in Industrial Control Systems (ICS), such as the SCADA system.
 - **Examples:** Building Management Systems (BMS), Heater Ventilation Air Conditioning (HVAC)
 - **Exclusions:** OT systems without remote access from the Internet and with no cloud components
4. **Cloud SaaS Technology:** A software distribution model in which a service provider hosts applications for customers and makes them available to these customers via the internet.
 - **Examples:** Salesforce, Snowflake, Amazon Web Services.
 - **Exclusions:** Software, images, or documents to be downloaded, installed, and used on City systems.

III. Cybersecurity Risk Assessment Timing

For each technology that qualifies for one or more of the categories named above, City departments are required to perform (CRA) as a solicitation is being conducted and during the evaluation of responsive proposals/bids. Where a solicitation is not being conducted, prior to requesting permission from OCA to waive or alter solicitation requirements or in the event of a sole source contract.

IV. Prime Contractors and Resellers

Where the technology and/or technical services are procured through a prime contractor or reseller, CRA must be performed for the entity(ies) responsible for manufacturing the

product, performing the technical functions related to the product's performance, and/or accessing City's networks and systems. In some instances where the prime contractor or reseller plays an active role in each of these activities, CRA shall also be required for the prime contractor or reseller.

VI. DT CIO Review Requirements and Applicability

I. When is DT CIO Review Required?

Subject to certain exempt categories defined below, DT CIO Review is required for all Technology Purchases. Technology purchases include all digital products that contain or transmit data and/or interact with the City's networks are deemed to be a Technology Purchase by the City, including computers, technical services, hardware, software systems, software maintenance, cloud services, and telecommunications. Where applicable, departments are encouraged to communicate with DT prior to commencing the solicitation process to ensure DT has adequate input where required.

DT CIO Review is primarily focused on:

1. Assessing network security risks associated with IT procurements;
2. Minimizing degradation of network performance due to IT procurements that introduce added complexity or potentially incompatible infrastructure to City data networks; and
3. Evaluating the potential for strategic sourcing efforts.

II. Technology Purchases for Which DT CIO Review is Not Required

DT CIO Review is not required for the following categories of technology purchases:

1. User hardware: desktop computers, laptops, tablets, monitors, keyboards, mice, desktop printers, accessories (e.g. connection cables and adapters), ink cartridges, and toner, and corresponding hardware maintenance agreement
2. Cable, fiber, patching and splicing materials and other associated tools and supplies
3. Software products purchased under a Department of Technology Enterprise Agreement.
4. Renewal or extension of existing, **on-premises** licenses or maintenance agreements. *Cloud-based subscription renewals are not exempt from DT CIO review and require CIO review for each renewal.*
5. Technology training.
6. Procurements initiated by the Department of Technology.

Note: All technology transactions must go through OCA. Therefore, Departments may not use Prop Q authority for information technology purchases, even if they are deemed preapproved through CIO review.

III. How to Initiate CIO Review

Departments initiate CIO review via DT's online [ServiceNow](#) platform.

IV. **CIO Review Timeline and Notification**

If DT does not respond within 5 business days, the requestor will receive an email indicating the request is deemed approved through CIO Review. Requestors will receive emails from DT indicating whether their request is approved, on hold for further review, or on hold pending further information from the requestor.

V. **Documentation for Submitting a Contract or Requisition to OCA**

If your technology is subject to DT CIO review or CRA, you must provide the ServiceNow ID associated with your approved purchase and/or copy of DT's approval obtained through ServiceNow.

VII. **Chapter 19B Surveillance Technology Requirements and Applicability**

I. **Overview**

City departments must develop, through COIT, a Board of Supervisor approved 19B Policy for any technology that meets the definition of Surveillance Technology under [Chapter 19B of the Administrative Code](#). The 19B Policy must clearly identify when, how, and by whom the Surveillance Technology will be used. It must also be developed prior to contract execution or PO issuance.

II. **Documentation for Submitting a Contract or Requisition to OCA**

Except for the list of Preapproved Technologies provided in Section IV below, City departments are required to complete the [Chapter 19B Applicability and Exemption Test](#) for **all technology contracts or requisitions** to determine if their technology:

- (A) is a Surveillance Technology,
- (B) is subject to any exemptions, or
- (C) if a 19B Policy is required.

III. **What is Surveillance Technology?**

Generally speaking, "Surveillance Technology" is any technology that is used to collect information on any individual or group. Examples include:

- closed-circuit television cameras, video and audio monitoring and/or recording technology, such as surveillance cameras, wide-angle cameras, and wearable body cameras
- facial recognition software
- automatic license plate readers
- electric toll readers
- international mobile subscriber identity (IMSI) catchers and other cell site simulators
- gunshot detection hardware and services
- mobile DNA capture technology

- biometric software or technology, including facial, voice, iris, and gait-recognition software and databases
- software designed to monitor social media services
- x-ray vans
- software designed to forecast criminal activity or criminality
- radio-frequency I.D. (RFID) scanners
- tools used to gain unauthorized access to a computer

IV. **Preapproved Technologies for which the Chapter 19B Test is Not Required**

Departments **need not submit** a ServiceNow request for the following types of technology:

1. **Standard office computer equipment** (including laptop computers, desktop computers, servers, monitors, keyboards, computer mice, and docking stations)
2. **Technology peripherals** (including ethernet cords and flash drives)
3. **Standard motor vehicles like cars or trucks** (unless the vehicle has ALPR, person recognition, biometric or other surveillance technologies as a feature of the vehicle)
4. **Cybersecurity software** (such as firewalls, cybersecurity testing software, or other tech items which are meant to make systems more secure or test that security technologically)
